Students invest and upgrade their skills with SAP certifications.

SAP training and certification programs are globally designed and highly respected by employees and employers alike in top-tier Fortune companies around the world.

Whether you are a technology or business professional, SAP training can help support your employer's organisational goals. In the fast-changing IT industry and increasingly demanding business environment, these skills help you stand out and enable you to integrate together technology and business interests for superior business performance.

SAP's partnership with the University of Technology, Sydney, (UTS) offers global-standard resources to help you prepare for your next career move anywhere in the world.

Take your first step today to become a sought-after SAP consulting professional and tap into a rewarding global career.

A testimonial from a student who achieved SAP certification at UTS

"There are no illusion in learning. Realistic skills and concepts are taught to familiarise and prepare you for employment. Employers highly value SAP certifications, even when they are not using SAP software. Thanks to the great tutelage at UTS and my achievement of obtaining SAP certifications, I am very confident in having a long, successful career as an SAP consultant."

Balesh Singh Dhankhar, Graduate of UTS

Benefits
