Minimize Risks with Data Migration Services from SAP

What if you could reduce the risk associated with implementations and upgrades by addressing data quality issues before the software goes live? What if you could improve data governance for better business insight and enhanced operational efficiency moving forward? Now you can – with SAP® Data Migration services.

Summary
SAP Data Migration services from SAP Consulting help you reduce implementation costs and avoid project delays. Combining proven expertise with the SAP BusinessObjects™ portfolio of solutions, our services help you analyze, extract, transform, cleanse, validate, upload, and reconcile legacy data in your SAP software environment. In addition to minimizing risk when going live, these services help you build a mature information infrastructure and establish data governance best practices for better decision making.

Business Challenges
- Migrate data on time and within budget to support successful implementations
- Coordinate IT and business goals for data migration
- Address data quality issues during migration
- Mitigate gaps between available source data and target data requirements
- Consolidate data from multiple sources and integrate dissimilar data

Key Features
- **Proven methodology** – Migrate your data based on the ASAP methodology
- **Advanced templates** – Outline steps for every stage of the migration process using the SAP Best Practices for Data Migration package
- **Dashboards, Web-enabled reports, and other tools** – Manage data quality and monitor the progress of your migration project
- **World-class expertise** – Leverage functional and technical know-how of SAP experts

Business Benefits
- **Reduce project risks** by carefully planning migration tasks
- **Minimize unanticipated costs and business disruptions** by addressing data quality issues proactively
- **Build a foundation for data governance** by defining roles and responsibilities for subsets of master data
- **Increase operational efficiency and user acceptance** by improving data quality

PROVEN DATA MIGRATION FROM LEGACY SOFTWARE

Your data is valuable and must be handled carefully in any software implementation. SAP® Data Migration services blend expert support from SAP with the industry-leading SAP BusinessObjects™ portfolio of solutions to facilitate data integration and enhance data quality.

This combination gives you the standardized framework, templates, proven methodology, tools, and expertise you need to achieve success. These make it possible for you to analyze, extract, transform, cleanse, validate, upload, and reconcile legacy data in your SAP software environment.

Our services also provide a proven information management infrastructure as you upgrade, transition to, or replace legacy systems with SAP software. An integral part of the ASAP methodology, these services address key issues such as data quality and legacy system decommissioning. By defining roles and responsibilities for subsets of master data, they help you build a foundation for data governance.

YOUR ROAD MAP TO SUCCESSFUL DATA MIGRATION

SAP Data Migration services support the entire migration lifecycle. They provide several key types of support to maximize the success of your project.

Data Migration Workshop

In this two-way knowledge exchange, we explain the data migration solution and methodology, demonstrate the tools used, and gather information for a findings and recommendations report. You gain insight into where and why projects go wrong and learn how best to manage risk.

Data Quality Health Assessment

In this service, you provide us with a data set, which is then profiled by an SAP data quality consultant. At the end of this engagement, we provide a report that highlights areas of risk and recommend ways to mitigate them.

Data Migration Planning and Assessment

In this engagement, you work with SAP experts to examine your legacy systems, infrastructure, information management needs, and project management approach – as well as your data. The net result of this effort is a clearer idea of your data migration costs, risks, timeline, and scope.

Data Migration Implementation

You can employ SAP experts to conduct your data migration, teach in-house project teams, serve as a quality-assurance advisor, or work with your implementation partner. Tapping the product and domain knowledge of SAP experts in these ways can further the success of your implementation and maximize your software investment.

A BETTER APPROACH TO DATA MIGRATION NOW WITH FUTURE BENEFITS

Together, these services pave the way for a smoother, more efficient migration of your data. At the same time, they facilitate improved data governance, greater operational efficiency, and enhanced decision making to benefit your organization long after the migration project is finished.
