Fast Energy: Improving Management with SAP® Crystal Reports®, Version for SAP Business One

Based in Nairobi, Kenya, Fast Energy Limited imports and sells petroleum products in eastern Africa. Incorporated in 2011, it required a method of centrally managing its inventories and for capturing landed costs. Based on the real-time reporting of SAP® Crystal Reports® software, version for the SAP Business One application, Fast Energy was able to **buy and sell fuel more efficiently** through better management of its purchase and sales processes.

Real-time reporting improves sales management

SAP® Crystal Reports® delivers actionable insight

Objectives
- Deploy software support for purchasing and sales business processes
- Gain overview of purchasing and sales
- Manage purchase and sale of fuel more effectively

Why SAP
- Leading provider of enterprise resource planning (ERP) software
- Software support for centralized data maintenance
- Recommendation of trusted business peer

Why partner
- SAP gold partner
- Provision of a high level of aftersales support, which was praised by partner clients

Benefits
- Established central management of inventories
- Managed purchasing and sales processes to handle buying and selling of fuel more effectively
- Gained ability to capture landed costs

"SAP software has simplified our IT landscape, which has contributed to more reliable, consistent performance of our local business."
