Summary

Take a comprehensive approach to financial and management accounting with the SAP® ERP for Finance and Controlling rapid-deployment solution powered by SAP HANA®. The integrated solution gives you the enterprise resource planning functionality you need to reduce risk and plan for the future, with support for everything from general ledger to overhead cost accounting. And you get fast time to value with a solution that is flexible and scalable to meet your changing needs.

Objectives

- Improve financial process integration
- Gain financial insights through a unified view of the business
- Drive operational efficiency
- Enable regulatory and corporate compliance

Solution

- Financial transaction recording and complete, accurate accounting
- Tracking of planned and actual nonoperational costs through cost centers
- Recording of accounts receivable and accounts payable posting in the general ledger
- Automated depreciation and interest value calculation and fixed-asset visibility

Benefits

- Accelerate financial closes
- Gain insights into financial business processes and increase reporting accuracy
- Improve cash management and optimize working capital, liquidity, cash, and returns
- Reduce banking fees and balance the books

How can you integrate financial activities and improve transparency into increasingly complex processes to provide business insights, drive efficiency, and enable compliance? With the SAP ERP for Finance and Controlling rapid-deployment solution powered by SAP HANA, you can get results quickly and affordably. The solution provides powerful enterprise resource planning functionality that enables you to manage multiple geographies, divisions, subsidiaries, general ledgers, and currencies; reduce costs and risks; and grow the business while maintaining profitability and customer satisfaction.

The comprehensive solution supports a full range of activities and has the flexibility and scalability to meet your business and budget demands – now and in the future. Financial accounting functionality complies with the national financial reporting framework in covered countries and offers the full scope of general ledger, accounts payable, accounts receivable, and asset accounting. Management accounting functionality delivers, through the instruments of overhead cost accounting and standard cost calculation, crucial information for enterprise management and operational and strategic decisions.

Choose SAP or trusted partners to deliver implementation services for your rapid-deployment solution, minimizing deployment risks, with hardware, hosting, and financing options aligned with your on-premise or cloud deployment.
