The SAP ERP for Manufacturing rapid-deployment solution powered by SAP HANA facilitates activities for process, discrete, and repetitive manufacturing. With the solution, you can improve how you manage crucial business processes, including procure to pay, make to stock, and order to cash. The solution enables you to identify the many drivers and processes that impact manufacturing performance, and integrate manufacturing and financial processes. The upshot is that you can better manage suppliers, capital, and risk, and improve your margins.

The solution helps you manage multiple geographies, currencies, business units, and general ledgers; standardize and streamline processes; and gain a unified view of the business and visibility into real-time data. Now, you can manage the entire sales cycle, from order generation to postsales activities. You can optimize procurement and logistics cycles for requisitioning, invoicing, and payment processing. Connect divisions, plants, departments, and business partners – and speed financial closings with automated processes and reporting.

Choose SAP or trusted partners to deliver implementation services for your rapid-deployment solution at a fixed price, scope, and time frame, minimizing deployment risks. Options for hardware, hosting, and financing can be aligned with your on-premise or cloud deployment.
