

BUSINESS INTELLIGENCE FOR PEOPLESOFT ENTERPRISE

LEVERAGING THE SAP® BusinessObjects™ SOLUTION PORTFOLIO

Preferred Business Intelligence for PeopleSoft

For many years, Crystal Reports® software, the de facto industry standard in enterprise reporting, and SAP® BusinessObjects™ solutions, a leading business intelligence (BI) platform, has been embedded in Oracle's PeopleSoft Enterprise – making SAP BusinessObjects solutions the natural choice for extending your BI deployment across all Oracle and non-Oracle applications and data. With the SAP BusinessObjects portfolio, you can give extreme insight into critical data to every user across your organization. The software is designed to allow your end users to easily interact with familiar, highly formatted reports that deliver the information they need to make better-informed decisions. Leveraging the SAP BusinessObjects solution portfolio, PeopleSoft customers benefit from:

- **Rapid deployment** – Customers receive Crystal Reports and SAP BusinessObjects Enterprise software with their PeopleSoft Enterprise applications. Our embedded solutions allow you to quickly deploy enterprise reporting throughout your organization.
- **Powerful report design** – Your report authors can use the visual report designer – with a complete set of layout and design controls – to design highly formatted, interactive, professional reports.

- **Report management and delivery** – Your reports can be easily integrated into any portal, for secure delivery of sensitive corporate information to make better business decisions at all levels of the organization. Your reports can be exported and repurposed to the electronic formats – such as Microsoft Excel or PDF formats – that are used by most end users.

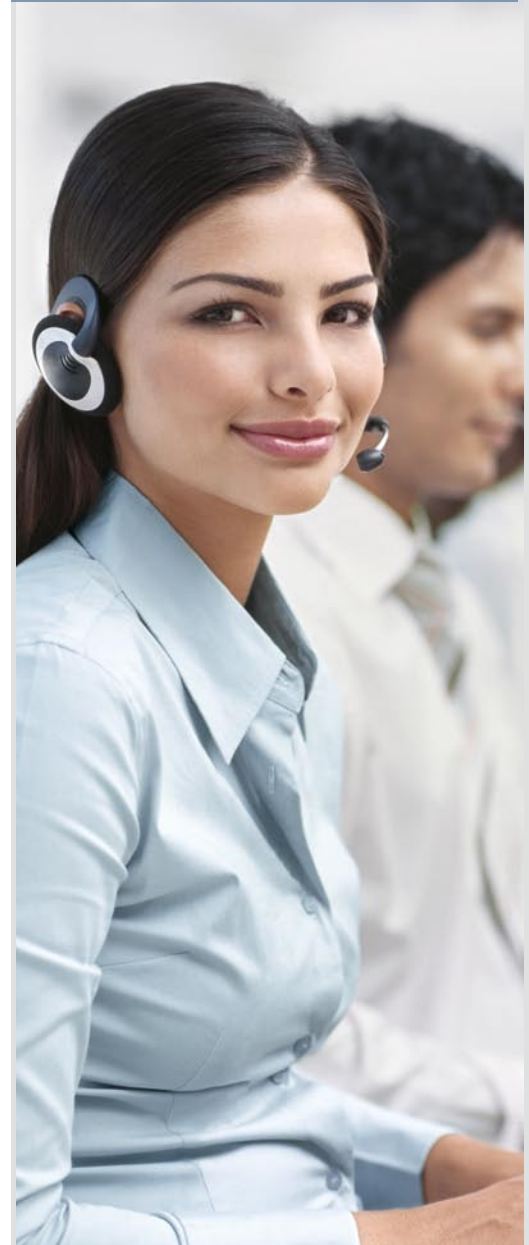

With SAP BusinessObjects XI, we continue to bring you a leading intelligence platform that delivers insightful end-user functionality to customers using the PeopleSoft environment. Whether you are looking to standardize on a BI solution that complements your PeopleSoft deployment or seek a consolidated view of your data using leading BI capabilities, the SAP BusinessObjects portfolio comprises the right tools and solutions to help you make the most of your PeopleSoft investment.

Leverage What You Already Have

Since 1993, thousands of PeopleSoft Enterprise applications customers have relied on SAP BusinessObjects solutions to extract the value stored in their operational systems.

As a PeopleSoft Enterprise or PeopleSoft Enterprise Performance Management (EPM) user, you already are familiar with Crystal Reports and SAP BusinessObjects Web Intelligence® software. Now you can leverage that

SAP® BusinessObjects™ business intelligence (BI) solutions provide the technology, tools, and packaged data applications required to bring business intelligence to your PeopleSoft Enterprise data.

investment and product knowledge, and extend our leading BI functionality to more users and more data sources in your organization. Since Crystal Reports and SAP BusinessObjects Web Intelligence are built on top of the SAP BusinessObjects Enterprise BI platform, you can quickly and easily expand your organization's BI functionality without spending too much time and resources on training, administration, or deployment.

BI Integration for PeopleSoft

Using SAP BusinessObjects Enterprise and SAP BusinessObjects Integration software for PeopleSoft, customers can take advantage of a single platform for ad hoc query and analysis from PeopleSoft EPM and Crystal Reports-based operational reporting from transactional PeopleSoft applications.

With this integration solution, our customers using PeopleSoft can expect:

- Smooth integration with PeopleSoft Enterprise and PeopleSoft EPM environments
- Ease of expansion as you add more users, more data sources, or more BI capabilities

Integrating SAP BusinessObjects and PeopleSoft Enterprise

Based on the proven SAP BusinessObjects Enterprise architecture, we offer SAP BusinessObjects Integration software for PeopleSoft Enterprise applications. Providing direct connectivity to your PeopleSoft Enterprise environment, our integration software enables you to consolidate and transform vast amounts of data

into reports, analyses, visualizations, and dashboards for every aspect of the business while ensuring data security and compliance.

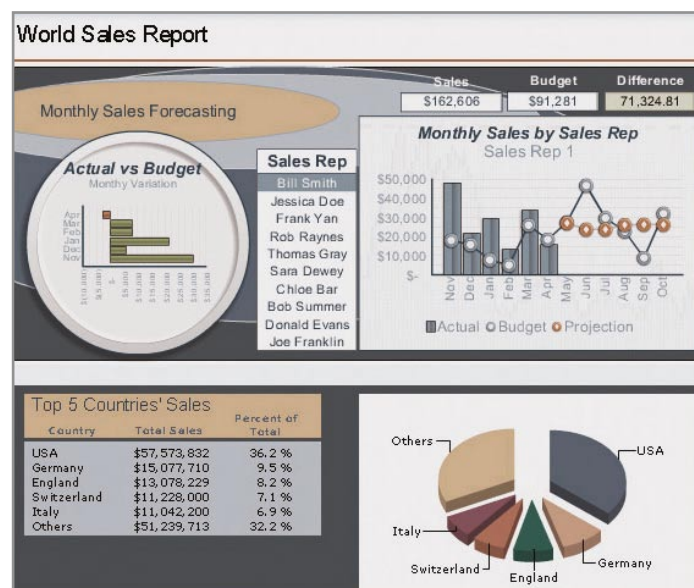

Integration Features

SAP BusinessObjects Integration software is designed to offer seamless integration with PeopleSoft Enterprise by providing native data connectivity and secure access using single sign-on and your existing security model. Additionally, SAP BusinessObjects Integration provides the ability to organize and display business intelligence within your existing enterprise portals, allowing you to view and edit BI content, schedule reports, and integrate BI content in existing workflows. The integration solution includes the following features:

- **Native Unicode-compliant driver** – This driver connects Crystal Reports directly to your PeopleSoft data.

- **Security plug-in** – The plug-in allows PeopleSoft Enterprise users to use their credentials when logging on to SAP BusinessObjects Enterprise.
- **Central management and administration** – This functionality addresses roles and responsibilities, users and groups, and security settings – all managed through the SAP BusinessObjects Enterprise central management console.
- **Contextual awareness** – You can link directly from within PeopleSoft menus and business components to the relevant SAP BusinessObjects folders and Crystal Reports documents.
- **Security bridge** – Integrating SAP BusinessObjects Enterprise with PeopleSoft EPM, the security bridge allows users to view PeopleSoft data when accessing an SAP BusinessObjects universe.

The SAP BusinessObjects integration

Gain Real-Time Insights into PeopleSoft Enterprise Data

solution offers several key benefits to PeopleSoft customers. Users can rely on Crystal Reports to provide access to any PeopleSoft system, whether it is their HR or general ledger system. Access is completely transparent to end users, who simply sign on to SAP BusinessObjects Enterprise using their PeopleSoft credentials. With Crystal Reports software, end users can access familiar reports that deliver the information they need to make better decisions.

The integration solution is designed to work with earlier versions of PeopleSoft Enterprise, allowing customers to unlock the value of their data without having to upgrade. Additionally, the security bridge for PeopleSoft EPM offers users ad hoc analysis, so they can effortlessly answer critical business questions to improve enterprise performance today. To offer you even more choices, the SAP BusinessObjects Integration version for PeopleSoft Enterprise applications is available for Windows and UNIX platforms, including Linux.

Data Integration for PeopleSoft

SAP BusinessObjects solutions provide the technology, tools, and packaged applications required to rapidly and successfully integrate data from PeopleSoft Enterprise applications with other systems.

SAP BusinessObjects Data Integrator software is a real-time and batch data integration tool designed to simplify

and speed data movement and data sharing across the enterprise. SAP BusinessObjects Data Integrator is designed to allow organizations to easily explore, extract, transform, and deliver data anywhere, at any frequency. Ensure the integrity of your data, maximize developer productivity, and accelerate data integration performance for all operational and analytic initiatives.

SAP® BusinessObjects™ Rapid Marts® Packages for PeopleSoft

Accelerate the deployment of analytic solutions, enable your organization to quickly build application-specific data marts and gain immediate insight into business operations without waiting for a long data warehouse deployment or placing a heavy burden on your IT staff.

SAP BusinessObjects Rapid Marts packages are an add-on to SAP BusinessObjects Data Integrator. Accelerating your time to information,

they help you avoid the frustrations of attempting to build, customize, or work with proprietary data mart or warehouse solutions.

SAP BusinessObjects Rapid Marts packages are packaged, powerful, and flexible data integration solutions that combine domain knowledge with data integration best practices to deliver a prebuilt data mart, an SAP BusinessObjects semantic layer (SAP BusinessObjects universe), and pre-defined analytics and reports. SAP BusinessObjects Rapid Marts packages for PeopleSoft are available for HR, accounts receivable, accounts payable, general ledger, and asset management functions.

Take the Next Step

Gain better customer insight today by extending the value of your PeopleSoft investment with our flexible and open platform, combined with innovative end-user capabilities. Equip your users with the customer information they need today to offer better products and service to your customers.

Summary

The SAP® BusinessObjects™ solution portfolio provides the technology, tools, and packaged data applications needed to enrich Oracle's PeopleSoft Enterprise environment with business intelligence (BI) functionality. SAP BusinessObjects BI solutions include SAP BusinessObjects Data Quality Management software, SAP BusinessObjects Data Integrator software, and SAP BusinessObjects Rapid Marts® packages, among other solutions.

Business Challenges

- Enable BI integration with PeopleSoft Enterprise applications
- Build a flexible and open architecture intelligence platform
- Ensure data quality across applications

Key Features

- **Native Unicode-compliant driver** – Connecting Crystal Reports® software directly to PeopleSoft Enterprise data
- **Data Security** – Tight integration with PeopleSoft security gives your users instant and secure access to data based on their PeopleSoft credentials
- **Data quality** – Understand and cleanse your organization's data to correct errors, enrich data, and improve end-user trust and confidence in reporting
- **Data marts** – Accelerate deployment with prebuilt data integration solutions for accelerating the deployment of analytics from PeopleSoft Enterprise applications

Business Benefits

- **Trusted intelligence platform**, support the management and secure deployment of performance management, reporting, query, and analysis tools on a scalable and adaptive open service-oriented architecture
- **Rapid deployment and lower total deployment costs**, with prebuilt data marts helping accelerate time to market
- **Timely, comprehensive solution**, leveraging a robust portfolio of products for managing integration of your PeopleSoft Enterprise applications
