Overview

**Optimize and Streamline
Trading, Inventory, and
Financial Activities**

The Best-Run Businesses Run SAP™

Quick Facts

Overview

Summary

Now, you can take advantage of software that truly addresses the demands of the trading profession. The SAP® ERP for Trading rapid-deployment solution powered by SAP HANA integrates processes, gives your team a unified view of the enterprise, and helps standardize processes, cut costs, and facilitate compliance. The offering combines software and implementation services for a fixed price and scope, taking the complexity out your implementation and delivering value in weeks.

Objectives

- Integrate processes and gain insights
- Improve compliance and operational efficiency
- Manage multiple geographies, divisions, general ledgers, and currencies
- Gain real-time visibility into transactional data

Solution

- Financial performance, supply chain, inventory, and process management
- Business opportunity and risk identification
- Procure-to-pay, order-to-cash, logistics, and warehouse management
- Procurement automation and financial optimization
- Supplier, capital, and risk management

Benefits

- Streamline processes and identify opportunities
- Minimize billing disputes, costs, and errors; reduce customer calls
- Drive innovation and customer satisfaction
- Reduce inventory costs, enable real-time inventory tracking, and increase reporting accuracy
- Speed ROI

Quick Facts

Overview

In a competitive market where margins are always under pressure, trading companies must increase revenues and profitability and offer added-value services that drive high customer satisfaction. But business processes are complex, and typical solutions lack flexibility and don't address industry needs. The SAP ERP for Trading rapid-deployment solution powered by SAP HANA is designed specifically to support trading companies – helping you manage multiple geographies, business units, ledgers, and currencies. Now, you can integrate, standardize, and streamline processes, and gain a unified view of the business and visibility into real-time data. By supporting financial performance, supply chain, and inventory management, the software helps reduce costs, boost efficiency and reporting accuracy, and improve compliance. The result: better margins.

You can better adapt to customer and supplier demands and respond quickly to market changes. Foster innovation and boost customer satisfaction with better insights into customer needs and behaviors. You can automate procurement transactions, track inventory in real time, and reduce inventory costs. And by reducing billing disputes and errors, customer call volume goes down while customer satisfaction goes up.

Choose SAP or trusted partners to deliver implementation services for your rapid-deployment solution, minimizing deployment risks, with hardware, hosting, and financing options aligned with your on-premise or cloud deployment.
