- Functionality in the SAP ERP application to meet long-term business requirements without additional upgrades

#### Implementation Highlights

- Rapid completion of the project (within 2 months)
- Successful participation in the SAP Ramp-Up program
- Competent and flexible support by SAP Consulting

#### Key Benefits

- Usage of standard functionality, with no need for modifications
- Support for business requirements for audit management and PLM

Fischer Advanced Composite Components AG (FACC) designs and builds fiber-reinforced systems for the aviation industry. Products range from structural aircraft components to complete aircraft cabins. Services include R & D and engineering. A recent upgrade to the SAP® ERP application provides functionality to meet future business requirements.

**“The transition to SAP ERP was a cornerstone to support key business requirements. SAP Consulting teamed up with our internal team and made this project a success.”**

Hermann Grabner, IT Manager, Fischer Advanced Composite Components AG
